

Banteay Thmey Primary School

Facts

| | |
|---------------------|--|
| Name | Banteay Thmey |
| Type of facility | Primary School |
| No. of students | 129 (55 boys, 74 girls) |
| No. of Teachers | 3 (2 male, 1 female) |
| No. of classrooms | 1 school building with 4 classrooms, 2 toilets |
| Size of building | 288 m ² |
| Budget | USD 49,924 |
| Construction period | June – October 2014 |
| Project manager | Sinoeuy My (Mr.) |
| Location (Province) | Banteay Thmey village, Chong Kal District, Oddar Meanchey Province, Cambodia |

Description

In the past Banteay Thmey village was part of Banteay Chas village, which covered a large area. A few years back the government build a road through the village, which resulted into Banteay Chas splitting in two, Banteay Chas village and Banteay Thmey village. Currently 216 families are living in Banteay Chas and 246 families are living in Banteay Thmey. Until last year the school in this area was located in Banteay Chas, which meant that children had to cross the busy road in order to get to school. Crossing this road is very dangerous and resulted already in many accidents. Therefore the authorities agreed in 2013 to build Banteay Thmey Primary School. This will decrease the chance of road accidents and it decreases the student numbers at the school in Banteay Chas. Currently, they are teaching in a rotten, temporary building, built with support from the community. The building has three classrooms with 129 students from grade 1 to 3.

The construction of a new school building with four classrooms will provide the students with a higher quality learning environment. As soon as the school is able to offer the students a better and safer learning environment, the quality of the education will increase and the students will be more motivated to attend classes. School dropouts will further decrease.

Map

Implementation

The school building will consist of four fully furnished classrooms and two toilets. The government will support this project by providing training for the teachers, salary, teaching and learning materials, and the teaching curriculum. The government will also continue to monitor and evaluate the school regularly. The community members will contribute to the project by providing manual labour resources and maintaining the building after completion. We will hire a professional contractor who will be responsible for the main construction effort as well as the purchase of construction material and furniture. The contractor will be paid in five instalments after the completion of each agreed step. 5% of the labour cost will be withheld for six months as guarantee.

The sustainability of the project is assured, as the school is a registered government school and the community has a good relationship with the authorities. The children are also encouraged by parents and teachers to attend school and are able to continue with secondary school after finishing primary school. We consider this a low risk project. Construction will take place between June and October 2014.
