

# Sre Laor Primary School

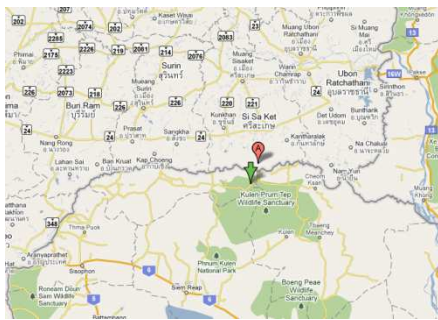

## Facts

Name	Sre Laor Primary
School	5 classrooms
Teachers	4 (1 female/3 male)
Students	183 (87 girls/96 boys)
Budget	US\$ 56,049
Construction period	April – Oct 2011
Project manager	Sokhom Saeng
Location (District)	Oddar Meanchey, Cambodia

## Description

Sre Laor was only established as a village after the end of the Cambodian civil war in 1998 and only then integrated by the Cambodian government. It is located 165km North of Siem Reap and is home to 216 families with a bit over 1,000 inhabitants. Most of the families are farmers, work in plantations or seasonally migrate to work in Thailand and Malaysia to make ends meet. In 2003 the villagers built two wooden school buildings with some thatched and some corrugated sheet roofs. These two buildings have three class rooms which are unsafe by now and insufficient for the 183 students. The WFP (World Food Program) funds the children's daily breakfast. A community health center funds additional vitamin A and drugs against worms that are given to the children twice a year.

## Map

## Implementation

We plan to build a new school building with 5 classrooms and furnish them with the required number of desks and benches for the children. The current toilets were only built recently and are still in functioning order. The school committee and the villagers are committed to support the construction by leveling the land, helping to build the foundation and by fencing off the school yard with a fence and a gate (to prevent cattle from coming onto the school yard). The flag pole will be provided by Child's Dream. Construction will start in April 2011 and is planned to be completed in October 2011. Teachers are sent and paid by the government. This is considered a low risk project. There is a potential transportation problem in case of a heavy rainy season. The contractor will be paid in 4 installments after each step is completed and approved by us. 5% will be kept as a guarantee for 6 months after handover of the building to the community.
