Budget	USD 36,749
Construction period	May – October 2016
Project manager	Saw Htoo Wah
Location (Province)	No.18 Monastic Education School, Tharsi Yard, Sagaing, Sagaing Division, Myanmar

Description

Zin Nya Kan Baw Za Post Primary Monastic School is located in Sagaing Division of central Myanmar. This monastic school was established in the year 2000. It offers education to over 500 students. A lot of students at this school are from Northern Shan State. They come to this school because there is a severe lack of decent educational infrastructure and curriculum in their home region. The monastic school is recognised by the government and uses the government curriculum. It has a good reputation and offers classes such as languages, computer classes, citizenship training and debating. Because of the success of this school, classrooms are heavily overcrowded and the school principal has to reject a high number of new applicants. There is an urgent need to expand the facilities so more students can get a decent education, and existing students can take classes in less crowded classrooms. In 2013 already, Child's Dream supported Zin Nya Kan Baw Za with a school building with six classrooms and eight toilets. In 2015 we supplied the school with necessary equipment for computer classes so students can acquire the necessary IT skills in order to find decent jobs. Since these past implementations have been very successful, we agreed to support Zin Nya Kan Baw Za Post Primary Monastic School with an additional school building with 4 fully furnished classrooms to allow more students to enrol and address the overcrowding issue.

Map

Implementation

We will support the Zin Nya Kan Baw Za Post Primary Monastic School by constructing one new school building containing four fully furnished classrooms. The government provides the curriculum and supports the teachers' salaries. Our approach is always to involve the community in the project to encourage ownership and community development. For this project, the monks will provide the needed red wood and will help facilitate during the implementation process. For the actual construction work we will hire a professional contractor, with whom we have successfully implemented other projects in the past. He will not only be responsible for the labour but also for purchasing the required materials and its transportation to the site. He will be paid in four instalments according to the progress of the construction work and 5% of the total amount will be held back for six months as a guarantee for the quality of the work. The monastery will be responsible for this school after the construction is completed. The construction work is planned to start in May 2016 and will take approximately six months to complete. Given our past experience with this school, we consider this a low risk project.
