

Phnom Prampy Primary School

Facts

Name	Phnom Prampy
Type of facility	School Building
Number of students	531 (265 boys, 266 girls)
Number of teachers	11 (7 male, 4 female)
Number of classrooms to be built by us	1 building with 4 fully furnished classrooms, 3 toilets, 1 flagpole and entry gate
Size of building	288 m ²
Budget	USD 47,279
Construction period	May to November 2017
Project manager	Sinoeuy My (Mr.)
Location (Province)	Phnom Prampy Village, Bour Commune, Phnom Preuk District, Battambang Province, Cambodia

Description

In spite of its flourishing tourism, Cambodia is still one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impedes the country's growth. The Phnom Prampy Primary School is located in Phnom Prampy Village in the Bour Commune in the Phnom Preuk District in the western part of Battambang Province which is close to the Thai-Cambodia border. The village was established in 1999 and the community consists of 890 people in 196 families from different parts of Cambodia. Most of the villagers earn their living through subsistence farming. Currently, there are three school buildings in the school vicinity. The first building with a total of five classrooms was made out of concrete and is still in good condition. The second and third buildings are temporary buildings made out of zinc walls and a zinc roof. The second building is even attached to the first building and has one classroom for two classes. The third building has two classrooms for three classes. The temporary buildings are in very bad condition, rotten and extremely hot in the dry season. The school, which was established in 2003, is now very crowded and offers education from primary level 1 to 6 to 531 students, aged 6-12. Currently, there are more than 100 children studying in the temporary outside buildings. In order to provide a stable, safe and conducive learning environment for the students, we will support Phnom Prampy Primary School by constructing a new high quality school building with four fully furnished classrooms, three toilets, one flagpole and an entry gate. The new building will emphasise the importance of education to the community even more and provide an incentive for the children to continue and complete primary education. We further expect that continuation rates to secondary school will increase, hence lower dropout rates.

Map

Implementation

In order to improve the existing insufficient learning environment, we decided to build a new school building with four classrooms, which will permit students to fully benefit from their education. As with all our projects, the local community will be involved in the construction process. Involvement of the community is critical, as it encourages a stronger sense of ownership over the project. The community will contribute by filling up the school foundation, building the school fence and follow up the construction. A local contractor will be hired to manage the labour and transportation of materials, oversee the construction, and arrange for the furniture needed. Once the project is completed, the school and community will be responsible for the maintenance of the school. Payments will be made in instalments, according to the progress of the construction and 5% of the total cost will be held back for six months, as a guarantee for the quality of the work. The teachers' salaries, trainings and follow-ups are supported and managed by the government. The project is considered low risk as the location is accessible all year round. Construction is due to begin in May and expected to be completed by November 2017.

Photos

Welcome to Phnom Prampy Primary School, which currently has one rotten and two old buildings.

Budget

Item	USD	In %
Construction Material	30,657	65
Labour	9,442	20
Transportation	795	2
Interior & Furniture	1,756	3
Implementation & Monitoring Cost	1,319	3
Administration Overhead	3,310	7
Total Budget	47,279	100

Classrooms are often very crowded and loud and conducted in a rotten facility.

The temporary building is unstable and doesn't protect the students from the elements.
