Size of building	360m <sup>2</sup>
Budget	<b>USD 62,632</b>
Construction period	May 2020 – October 2020
Project manager	Mr. Sinoeuy My
Location	Ampil Village, Ampil Pram Deum Commune, Bavel District, Battambang Province, Cambodia

## Description

In spite of its flourishing tourism, Cambodia is still one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impedes the country's growth. The Ampil Pram Deum Secondary School is located in Ampil Village, Ampil Pram Deum Commune, Bavel District, Battambang Province, Cambodia. The village was established in 1991 and the vast majority of the population is dependent on subsistence agriculture and plantation work for their livelihoods. The village is home to around 11,920 people in 3,087 households. It consists mostly of ethnic Khmer with an even gender distribution. The village has access to electricity, healthcare, water and mobile phone coverage. The Ampil Pram Deum Secondary School was established in 2003, consists of one building, and has 461 students (201 boys and 260 girls, aged 12 - 15) and eight teachers (two males and six females). It is currently heavily over-crowded with close to 100 students per room and the student numbers are set to increase in the coming years. Two contributing factors for the expected growth are that the school serves eight villages and the nearest other secondary school is 12 km away. Therefore, a new and standardised school building with five classrooms is urgently needed to provide a more motivating environment for the students to reach their full potential. Four new toilets will also be built to improve hygiene standards.

## Implementation

The Ampil Pram Deum Secondary School is a government registered school. The government will support the teachers' training and salaries and provide the curriculum and materials for teaching and learning. Our approach is to always involve the community in the project to encourage ownership and community development. For this project the villagers have agreed to contribute by backfilling the foundation and organizing the school opening ceremony. For the actual construction, we will collaborate with a local contractor to coordinate all phases of construction and to purchase all standard materials locally. Payments will be made in instalments, according to the progress of the construction with 5% of the total construction cost held back for six months, as a guarantee for the quality of the work. Once the project is completed, the community will be responsible for the maintenance of the school. This is a low risk project as the school is accessible all year round. The construction is scheduled to begin in May 2020 and it is targeted to be completed by October 2020.
