

Hun Sen Cheyniwat Secondary School

Computer Laboratory

Facts		Description
Name	Hun Sen Cheyniwat Secondary School	<p>Despite its growing tourism sector, Cambodia remains one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impede the country's growth. A high percentage of rural high schools in Cambodia lack essential technologies such as computer labs and many students have never seen or used a computer. Hun Sen Cheyniwat Secondary School is located in Toul Pongro Village in the Oddar Meanchey Province of northern Cambodia right along the border of Thailand. The school grounds are utilized quite well containing two school buildings, which were previously provided by the Ministry of Education. The main issue identified is the absence of a computer lab and training programme, an area where government funding is insufficient. This absence is very detrimental and impeding essential student development, especially those in their 10th, 11th and 12th grade who are in the midst of preparing for life after they graduate. There are 278 students (128 boys and 150 girls) aged 12 to 15 who are in desperate need of a fully functional computer lab and training programme. This is imperative for progressing with further academic and professional pursuits. The school is clearly in dire need of a computer training programme with new computers for the 10th – 12th grade students to give them a better opportunity at advancing in today's computer-reliant world ensuring they are not left behind.</p>
Type of facility	Computer Laboratory	
Number of students	278 (128 boys, 150 girls)	
Use of funds	31 computers, 31 headsets, 1 printer, 1 LCD projector, 2 air conditioning units, furniture	
Budget	USD 28,655	
Set-up period	August - November 2022	
Project manager	Mr. San Som	
Location	Toul Pongro Village Tumnob Dach Commune Trapeang Prasat District Oddar Meanchey Province Cambodia	

The secondary school is in good condition, well managed and ready for a computer lab

Implementation

We support the school's project by renovating an existing classroom into a computer lab equipped with 31 desktop computers. We will additionally provide 31 headsets, 1 printer, 1 LCD projector, 2 air conditioning units as well as appropriate furniture. These reinforcements will encourage and drive high-quality, sustainable computer classes for the students in grades 10 through 12. The funding also includes ongoing training for the computer teachers. The long-term impact of this project is quite expansive as basic computer knowledge is indispensable in today's labour market and also opens the doors of great opportunity. In addition, the new computer lab will improve the students' learning environment and increase their motivation as they witness the practical and useful applications of their education. The school will be responsible for arranging the purchase and installation of the new equipment, but we will offer support to ensure that the equipment is of high quality and that installation is carried out correctly. The students will contribute USD 0.25 per month to support the upkeep of the facilities, as agreed with the parents. We consider this a low-risk project. The school is located just off a main road, making it easily accessible during all seasons. The initial set-up begins in August 2022 and it is expected to be completed by November 2022.

Child's Dream staff meet with school officials to discuss the project

Budget		
Item	USD	In %
Initial start-up equipment	21,985	77
Labour Costs	980	3
Education & Training	2,885	10
Monitoring & Implementation Costs	799	3
Administration Overhead Contribution	2,006	7
Total Budget	28,655	100

An existing classroom will be renovated to become the new computer laboratory

The students are eager to learn and will greatly benefit from a computer lab programme
