

Roung Chrey High School

Computer Laboratory

Facts		Description
Name	Roung Chrey High School	<p>Despite its growing tourism sector, Cambodia remains one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impede the country's growth. A high percentage of rural high schools in Cambodia lack essential technologies such as computer labs and many students have never seen or used a computer. Roung Chrey High School is located in Prakeab Village in the Battambang Province of western Cambodia. The school grounds are well utilized with four school buildings in good condition. However, the school is currently using an old classroom as a computer laboratory. The computer laboratory only has a very few working computers, and the room and equipment rapidly become outdated. The school currently does not have enough equipment to properly teach computer skills and give students actual hands-on experience using computers. This is detrimental to the students, especially those in grades 10 through 12 who are in the midst of preparing for life after they graduate. There are 682 students (332 boys and 350 girls) aged 13 to 18 who are in desperate need of a fully functional computer lab. This is imperative for progressing with further academic and professional pursuits. The school is committed to revamp their computer training programme with new computers for the 10th – 12th grade students to give them a better opportunity at advancing in today's computer-reliant world ensuring they are not left behind.</p>
Type of facility	Computer Laboratory	
Number of students	682 (332 boys, 350 girls)	
Use of funds	31 computers, 31 headsets, 1 printer, 1 LCD projector, 2 air conditioning units, furniture	
Budget	USD 31,278	
Set-up period	May 2022 - autumn 2022	
Project manager	Mr. San Som	
Location	Prakeab Village Roung Chrey Commune Thma Koul District Battambang Province Cambodia	

Photos		Budget	
	Item	USD	In %
	Initial start-up equipment	24,801	79
	Labour Costs	300	1
	Education & Training	3,115	10
	Monitoring & Implementation Costs	873	3
	Administration Overhead Contribution	2,189	7
Total Budget		31,278	100
