

# Samki High School

## Computer Laboratory

Facts		Description
Name	Samki High School	<p>Despite its growing tourism sector, Cambodia remains one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impede the country's growth. A high percentage of rural high schools in Cambodia lack essential technologies such as computer laboratories and many students have never seen or used a computer. Samki High School is located in Anlong Samnar Village, Chi Kraeng District, Siem Reap Province, Cambodia. The school grounds are well kept containing four buildings which are in good, reasonable condition offering a safe and adequate learning environment for students. However, the computer lab, which was donated by an outside organization in 2010, is in extremely bad condition and lacks any functioning computers. This is especially detrimental to the students in grades 10 through 12 who are in the midst of preparing for life after they graduate. The school has a total of 874 students, 317 of whom are in these upper grades and are in need of adequate technological skills upon completion of their education. This is imperative for progressing with further academic and professional pursuits. The school currently lacks access of a suitable facility to effectively run its computer classes. The school would like to implement a practical computer training programme for the 10<sup>th</sup> – 12<sup>th</sup> grade students, thereby giving them a better opportunity at advancing in today's computer-reliant world and ensuring they are not left behind. We have years of experience in running computer labs successfully so we agreed to support the school.</p>
Type of facility	Computer Laboratory	
Number of students	874 (407 boys, 467 girls)	
Use of funds	31 computers, 1 printer, 1 LCD projector, 2 air conditioning units, furniture	
Budget	<b>USD 32,368</b>	
Set-up period	Oct 2023 – January 2024	
Project manager	Mr. San Som	
Location	Anlong Samnar Village Anlong Samnar Commune Chi Kraeng District Siem Reap Province Cambodia	

### Map

### Implementation

We support the school's project by renovating the existing computer laboratory and providing 31 desktop computers. We will additionally buy 31 headsets, 1 printer, 1 LCD projector, 2 air conditioning units as well as appropriate furniture. This will ensure the sustainable and high-quality delivery of computer classes for students in grades 10 through 12. The funding also includes ongoing training for the computer teachers. This project will have a long-term impact as basic computer knowledge is indispensable in today's labour market. Furthermore, it will improve the students' learning environment and increase their motivation as they see a practical and useful application of their education. The school will be responsible for arranging the purchase and installation of the new equipment, but we will offer support to ensure that the equipment is of high quality and that installation is carried out correctly. The students will contribute USD 0.25 per month to support the upkeep of the facilities, as agreed with the parents. We consider this a low-risk project. The school is located on a good road, making it easily accessible during all seasons. The set-up and installation begins in October 2023 and it is expected to be completed by January 2024.

### Photos

Samki High School is in reasonable condition, but lacks a functional computer laboratory

### Budget

Item	USD	In %
Initial start-up equipment	24,299	75
Labour Costs	2,000	6
Education & Training	2,900	9
Monitoring & Implementation Costs	903	3
Administration Overhead Contribution	2,266	7
<b>Total Budget</b>	<b>32,368</b>	<b>100</b>

The school environment and school buildings are all in good condition

However, the existing computer laboratory is outdated and the computers no longer work

Child's Dream staff meet with the school's management to discuss the project
