

Prey Secondary School

Facts

Name	Prey Secondary School
Type of facility	School Building
Number of students	144 (77 boys, 67 girls)
Number of teachers	9 (7 male, 2 female)
Facilities to be built by us	1 new building with 5 fully furnished classrooms and 3 toilets
Size of building	360 sqm
Budget	USD 63,186
Construction period	June 2020 – December 2020
Project manager	Mr. Sinoeuy My
Location	Prey I Village, Prey Commune, Srey Snom District, Siem Reap Province, Cambodia

Description

Despite its growing tourism sector, Cambodia remains one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impede the country's growth. The Prey Secondary School is located in Prey I Village, Prey Commune, Srey Snom District, Siem Reap Province, Cambodia. The village was established in 1979 and the vast majority of the population is dependent on farming for their livelihoods. The village is home to 4,015 people (51% female) in 882 households. The village has access to electricity, water and mobile phone coverage. There are currently 144 secondary-level students (77 boys and 67 girls, aged 12-15) and nine teachers (seven males and two females). The secondary school students and teachers currently use the primary school facilities, and there is overcrowding in the school. The students come from four villages, the farthest being seven km away. Therefore, a new and standardised school building with five furnished classrooms is urgently needed to provide a more motivating environment for the students to reach their full potential, and to allow for an expected increase in the number of students in the coming years. Three new toilets will also be built to improve hygiene standards. This new facility will also allow the primary school to use their facility exclusively, hence reducing overcrowding.

Map

Implementation

The Prey Secondary School is a government registered school. The government will support the teachers' training and salaries and provide the curriculum and materials for teaching and learning. Our approach is to always involve the community in the project to encourage ownership and community development. For this project, the villagers have agreed to contribute by backfilling the foundation, fixing the school's fence, and organizing the school opening ceremony. For the actual construction, we will collaborate with a local contractor to coordinate all phases of construction and to purchase all standard materials locally. Payments will be made in instalments, according to the progress of the construction with 5% of the total cost held back for six months, as a guarantee for the quality of the work. Once the project is completed, the community will be responsible for the maintenance of the school. There is a chance of slight transportation delays during the rainy season; otherwise, this is considered a low risk project. The construction is scheduled to begin in June 2020 and is expected to be completed by December 2020.
