

# Srekvav High School Building

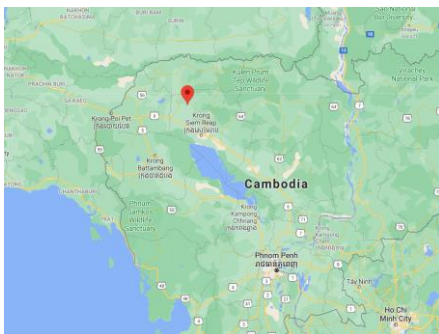

## Facts

Name	Srekvav High School
Type of facility	School Building
Number of students	451 (256 girls and 195 boys)
Number of teachers	11 (4 female and 7 male)
Number of classrooms to be built by us	1 school building with 6 fully-furnished classrooms and 4 toilets
Size of buildings	432 m <sup>2</sup>
Total budget	<b>USD 70,063</b>
Construction period	February 2021 - September 2021
Project manager	Mr. Se Jane Sik
Location	Srekvav Village, Srekvav Commune, Angkor Chum District, Siem Reap Province, Cambodia

## Description

In spite of its flourishing tourism, Cambodia is still one of the poorest and least developed countries in Southeast Asia. Development is not evenly distributed in the country and many rural communities remain poverty-stricken as corruption and self-interest impedes the country's growth. Srekvav Village is located in Srekvav Commune, Angkor Chum District, Siem Reap Province, Cambodia. The village currently has a population of 10,036 residents from 2,018 households. The residents of the village rely solely on rice farming for their livelihood. Srekvav High School was established in 2005 and caters to students aged 12 to 18 years of age. The school currently serves 451 students (256 girls and 195 boys) and employs 11 teachers (4 females and 7 males). The school consists of two concrete buildings and three zinc classrooms, which are interspersed around the school grounds. The concrete buildings, with a total of eight classrooms, are in good condition, but they cannot comfortably fit the increasing student population. The community constructed three zinc classrooms to alleviate the overcrowding, but these rooms become unbearably hot therefore students cannot concentrate on their studies. The school currently caters up to grade 11, but in the next academic year they will be accepting grade 12 students thus the overcrowding is only expected to get worse. The students clearly lack a suitable environment to focus on their learning. To address this situation, we will support Srekvav Village with the construction of one new concrete school building with six fully-furnished classrooms. The new school building will emphasize the importance of education to Srekvav Village and the surrounding communities and provide an incentive for the students to complete their higher secondary education. The new building will create a motivating learning environment in which students can reach their full potential. The project will also include four new toilets, which will improve sanitation standards and thus prevent hygiene-related illnesses. This will bring the total number of toilets to 10.

## Map

## Implementation

Srekvav High School is a government registered school. The teachers' salaries and training are supported and managed by the government. Our approach as always is to involve the community to instill a sense of pride and ownership in the project. For this project the villagers will contribute by filling up the land for the school foundation and organizing the school opening ceremony when construction is completed. The school staff and the community will be responsible for the operation and maintenance of the new school building. We will select a trusted local contractor to coordinate all phases of construction and to purchase materials as well as to arrange for the required furniture locally. The foreman will be in charge of selecting the construction team and will be responsible for covering all labour costs, transport costs, and construction materials. The contractor will be paid in four instalments based on the construction progress, with 5% of the total cost held back for six months as a guarantee for the quality of the work. We consider this a low risk project. Construction is scheduled to commence in February 2021 and is targeted to be completed by September 2021.

## Construction Budget

Item	USD	In %
Construction Materials	44,000	63
Interior Equipment & Furniture	3,157	4
Labour Cost	15,318	22
Transportation Cost	729	1
Project Implementation & Monitoring Costs	1,955	3
Administration Overhead	4,904	7
<b>Total Budget</b>	<b>70,063</b>	<b>100</b>

These temporary classrooms become overheated and create an atmosphere that is uncomfortable for teachers and students

With the student population increasing unabatedly, a new school building is urgently required
